CARRIER OBJECTIVE

To obtain a role in a software company where i can effectively apply my current skills to contribute to its growth, while gaining valuable experience and expanding my expertise through new challenges.

PROJECTS

Portfolio

Enhanced a personal portfolio to showcase skills, projects, and certifications with a professional, responsive design and Dedicated sections for about me, skills and projects.

Technologies Used : HTML, CSS, Bootstrap.

Sky-Report

Sky-Report is a small website that provides real-time weather reports, including the current temperature, wind power, and weather conditions. It also offers a 6-days future forecast, helping users stay informed about upcoming weather changes.

Technologies used : HTML, CSS, Java Script, Bootstrap.

To-Do-List

Built a dynamic to-do-list application to manage tasks efficiently with add, edit, delete functionalities and user friendly interface with intuitive design.

Technologies Used : HTML, CSS, Java Script, Bootstrap.

Banking Management

Expanded a static Java-based Banking Management System, supporting account management, transactions, and balance tracking through shared static methods and variables, ensuring efficient and simplified program structure.

Technologies Used : Java oops and Exception handling.

Student Management System

The Student Management System is a console-based application developed using Core Java. It allows users to add, update, delete, search, and display student records. The system uses object-oriented principles and stores data using file handling without a database. It's a simple project to demonstrate Java basics like classes, objects, collections, and exception handling.

Technologies Used : Java oops and Collections.

TECHNICAL STRENGTHS
